MENTAL, VERY FUKKIN' MENTAL

...Yes. Still another, new techno, housey raver thingy, eh? No way.

Prepare to get the goods. Mental is dedicated to living up to it's name- you see, this night aims to take your ho hum day to day life and morph it to smithereens; it seems 9 hours of extremes. Why not sayeth I propose starting ambient soundscapes to begin, then slow dark techno come in morph to noise core! Then jungle! hard fast 303 basslines soon rumble! and to top it all off... as if this weren't e-nuff, 400 bpm gabba to wipe your ass up.

The only remotely normal thing that this little night aspires to is a cover charge, so don't be cheap, support the artists and musicians that need to eat every other day. For just \$3.00 a week, you can feed an aspiring artist scraping by with only an exciting telemarketing job on the horizon. That equals out to just around 25 cents a day (I've never been good at math!)

Yes! Mental is shizophrenia honing towards perfection! Mental is anyone who wants to make, do, play, watch (ahem), pay, go nuts, get laiiiisting information for inspiration in the future, you know, this is gonna be dope+tastic-tic-tic-tic! My only question, why do people that run slide projectors always throw in a bunch of car crash pics? Do these people ever get laid?! I'm concerned. Anyway, support this night because it will become a weekly if it hits, and it would be nice to do at least one thing a week that isn't bland. And hey! If you can't make it...well, you can fuck off.

Yours truly, No, I'm not a cop,

Please join us for a mental night out in Denver Colorado (May 18) as nine different dee jays show off their unique choonz and stylees. From 5pm till 9pm you can join the crew downstairs (for phree) as they set up, chill out and spin lounge, ambient, swank and other obscure records. Enjoy the tasty food at the City Spirit Cafe upstairs and prepare for phun with the CITY SPIRIT's LA-LA drink (Absolut, triple sec, cranberry juice and Rose's lime).

At 9pm (\$3 cover, starts) promptly the wicked sounds get cranked and the beatz get extreme as the Dee-Jays get ruff and rowdy! MENTAL will have you jumping around as Colorado's virgin ear drums get pounded with Techno, Jungle, Hardcore and Gabba. There will be no mercy as special guest NITRO (in from Germany) and DEADLY BUDA (World Praxis Records) peak and ruin us all untill the 2am policia runs us all away.

If yer spirit runs rowdy then get MENTAL with the PIRATE SOUND SYSTEM, MENTAL PRODUCTIONS, the PHUN CREW and all our phriends on Saturday May 18th 1996 at the City Spirit Cafe located at 1434 Blake Street in lower downtown Denver Colorado. If you have MENTAL related skills; make contact to be involved!

CAPTAIN SCARLET

Captain Scarlet believes he is an indestructable puppet defending Earth from Jazz excess. Hailing from the holy lands of Derbyshire he received a full, rigorous and stern Techno education in Sheffield, UK - home of Forgemasters - the builders of the Iraqi Supergun. He arrived in Boulder a year ago to serve and protect and has been DJ'ing since year zero on Boulder's community radio KGNU(88.5FM), currently producing the Techno radio show "Grim up North" and "Electronic Air". He is also a founding member of the mighty Pirate Sound System, a Syndicalist DJ Commune, throwing the coolest free (or at least cheap) parties in Boulder and dedicated to "money free shopping" a concept they are currently working through with King Soopers.

CAPTAIN SCARLET'S 10 WITH CLOUT:

BLACK DOG - PARALLEL (GPR)

The ever growing world of death culture is catching up with us and the time for exodus is soon. The only way to grow is to expand beyond the boundaries of what we know into the uncharted areas of the unknown. The unknown being the only source of new knowledge. Our life support systems on this planet are organic. To regenerate cell walls, divide and multiply - old barriers fall away, ancient pillars crumble and new structures stand up in their turn. One generation gives birth to the next. The old gives life to the new. We live in the ever transitional moment connecting past through present to future. It is our mission to discover the ever changing horizon. To continually re-establish new parameters and to explore and secure each new level as we find it. It is our purpose to destroy the inertia that has been responsible for the demise of our lifeforce on our Planet. It is time to wake the Planet UP! We - The Generation ov Noise - using technology, combined with organic life systems deliver a massive jolt to Human sensory circuits, providing the extra energy input needed to make the Quantum leap from Terrestrial Consciousness to Extra Terrestrial Consciousness. (Taken in part from spiral tribe 23 "techno terra" .Modified for G.O.N.)

Heyoc and Mayhem shall occur on American soil in '96. This is a call to all sound systems and people to come and annihilate the land of the so called "free". We request your presence, attendance and participation in the travelling free festival. All

are welcome and none shall be turned down. The states are in need of some TRUE anarchy and chaos...there are 9 dates being planned out...all sound systems, DJs, bands, vehicles, firstaid, mobile kitchens, hackers, promoters, live acts, vendors, and general PEOPLE POWER are requested...no egos, just one huge agGrow tribe, we need your help to create a fire in the american underground.

YES we could spend more time trying to secure the necessary permits and going thru the proper channels and avoiding unpleasant friction - but this would only dilute the required intensity and vibrational quality of our gatherings - the only permit we need to gather is the First Amendment to the United States Constitution. We know what we are doing - We know how it needs to be done. Our so called "leaders" and "authorities" have had their chance and have basically failed to impress. We have the knowledge. We have the resources. We are now taking control of our destiny and will accept nothing less. We are tired of clueless, powermad control freaks wasting our time. We are a true and Positive Life Culture - The Death Culture seeks to repress us because we threaten it's existence and power structure. It's time to establish our rightful place on this planet.

OUR TOOLS FOR CHANGE ARE -MUSIC-DANCE-LOVE-MAGIK-THE COMMITMENT ONE MUST TAKE TO SERVE THIS EXCURSION INTO FREEDOM AND CHAOS

TECHNO ON THE RADIO

Tired, frustrated, ready to riot? Don't be silly - you'll get shot - instead check out Techno music on your radio wireless set. KGNU in Boulder broadcasts Techno, Jungle, hardcore, ambient and newwave electronica (all at the same time - watch) at 88.5FM. Quick Denver hint - if the reception is a bit crap try pressing some sort of "Mono" button on your radio receiver - this needs a tenth of the incoming radio power and often sorts the prob (although you only get mono of course). We have all witnessed crystal clear (ish) reception of KGNU in Denver using this technique - still having trouble - send a note to:

*Why can't KGNU have more Power?
The Vatican
Italy*

KGNU's top of the range chrome plated Techno show is "Electronic Air", the first Friday night of every month at midnight (that's Friday night/Saturday morning - got it?). Next show is May 3rd - plus a bonus one a week later - May 10th (this sometimes happens - random world). We bring you 3 hours of the best of the world's Techno music from a collective of local - on it - DJs - plus guest spinners, local Techno bands/artists - news from the world of the moderrrrn etc. etc. ALSO - Second and Fourth Thursday's of the month at midnight you can hear "Grim Up North" - more Techno musiqe with charming host Captain Scarlet.
